Main exhibits

「Mabuchi Hybrid Pole II」

- Power generation system that produces power from that point (Point Of Use) that requires power, ready-to-use
- Composite type power generation equipment to the power generation of the wind and the light hybrid, with more than one energy source
- Power production system of "local production for local consumption type" that take advantage of the clean natural energy
- Independent commercial power do not need self electric multifunction street light

PR Point

- Infinite energy from nature (wind , Photovoltaic)
- Full power generation systems to demonstrate the strength in case of emergency
- High efficiency wind power generator to start with low wind speed (1.2m / s)
- High efficiency and high brightness LED lighting (35w)
- Easy to maintenance (three years of battery replacement)
- Wide range of applications (escape routes, street, parks, schools, hospitals, parking lots, etc.)
