Main exhibits

Introduction of robot competition "World Robot Summit" to be held for the first time in the world in 2020.

PR Point

In order to realize a society where people and robots coexist, we introduce the event "World Robot Challenge" that challenges the events set for each category such as "Monodzukuri" and "infrastructure / disaster response"and more. And the latest robot introduction case in the exhibition "World Robot Expo".

Accelerate social implementation and research and development of robots in real life, society and industrial fields.

World Robot Summit
